Profile

Offensive security professional and **OSCP-certified** penetration tester with **4+ years** across web, API, mobile, network, and Active Directory security. Experienced in VAPT, red team engagements, and adversary simulation for enterprise, banking, and fintech clients. Ranked among the top HackerOne researchers with **800+ valid reports** (Top 22 globally) and Hall-of-Fame recognition from **Microsoft, Apple, TikTok, and the U.S. DoD**, with proven skills in exploit development and executive-level reporting.

Professional Experience

SecurEyes – Cybersecurity Consultant
03/2024 Present

SAMA Fintech Saudi – Security Assessment Engagement | 06/2024

- Participated in on-site security assessment visits, alongside the central bank, to evaluate fintech and financial-sector companies.
- Conducted comprehensive assessments covering **web applications, mobile applications, and network infrastructure** for each entity.
- Identified and reported security vulnerabilities across the assessed systems, providing remediation guidance to align the entities with regulatory security standards.
- Documented findings in detailed technical reports for both the financial entities and the central bank's oversight team.

SAMA – Internal Penetration Tester | 03/2024

- Conducted internal penetration testing across web applications, APIs, and mobile platforms within the bank's environment.
- Assessed critical financial systems and internal infrastructure, identifying and reporting high-impact vulnerabilities.
- Delivered detailed technical reports with reproduction steps and remediation guidance, and performed retesting to validate fixes.

Kilotech Security – Penetration Tester
01/2023 – 12/2023

- Conducted **web and network penetration testing** engagements, identifying and reporting exploitable vulnerabilities.
- Produced detailed technical reports with remediation guidance and retesting support.

Resecurity (Part-Time) - Cybersecurity Researcher
01/2023 – 06/2023

Performed part-time security research and web/network penetration testing, identifying and validating exploitable vulnerabilities with documented impact and remediation guidance.

HackerOne (Freelance) - Bug Bounty Hunter
04/2021 Present

- Submitted **800+ valid vulnerability reports**, ranking among the **top security researchers globally** (Top 22 for critical submissions).
- Reported and resolved high-impact vulnerabilities for major programs including the **U.S. Department of Defense, LinkedIn and Sony** — spanning OS Command Injection, SQL Injection, XSS, OTP bypass, CSRF, and unauthenticated file operations.
- Recognized in the Hall of Fame by **Microsoft, Apple, TikTok, Adobe, SAP**, and others for responsibly disclosing critical security flaws

BugBountySA (Freelance) -Bug Bounty Hunter 05/2021 Present

- Submitted security vulnerability reports to **Saudi organizations, including government entities**, through the national bug bounty platform.
- Invited to participate in **all editions of the Black Hat MEA bug bounty competitions** hosted on the Saudi platform.
- Reported and validated high-impact findings across web and API targets in line with the platform's disclosure standards.

Bugcrowd (Freelance) - Bug Bounty Hunter 05/2021 Present

Red Team & Adversary Simulation

Executed assumed-breach and adversary-emulation engagements simulating real-world threat actors across enterprise networks.

Performed Active Directory attack-path analysis using BloodHound — Kerberoasting, DCSync, and lateral movement toward domain dominance.

Applied EDR/AV evasion and detection-bypass techniques (AMSI bypass, ETW patching, payload obfuscation) under strict OPSEC.

Conducted authorized phishing and social-engineering simulations to assess organizational security posture.

Mapped all findings to the MITRE ATT&CK framework in technical and executive reports.

Technical Skills

Penetration Testing: Web, Mobile (Android/iOS), API, Network, Infrastructure, and Active Directory

Red Team & Adversary Simulation: Assumed-breach assessments, adversary emulation, attack-path analysis, lateral movement, privilege escalation, domain dominance, OPSEC

Active Directory Attacks: Kerberoasting, AS-REP Roasting, DCSync, Pass-the-Hash / Pass-the-Ticket, ACL abuse, Golden/Silver Ticket, BloodHound attack-path analysis

Vulnerability Expertise: IDOR/BOLA, SSRF, Authentication Bypass, Business Logic, JWT/OAuth attacks, XSS, SQL Injection, Account Takeover

Evasion & Defense Bypass: EDR/AV evasion, AMSI bypass, ETW patching, hardware-breakpoint evasion, WAF bypass (payload division, encoding, obfuscation), NAC & Firewall evasion

Tooling: Burp Suite, BloodHound, CrackMapExec/NetExec, Impacket, Responder, Nmap, SQLMap, Frida, Nuclei, Kali Linux

Application Security: SAST, DAST, Secure SDLC, Exploit Development

Methodologies: OWASP Top 10, OWASP API Top 10, OWASP MASVS, MITRE ATT&CK, PTES, SANS

Scripting & Automation: Python, PowerShell, Bash

CERTIFICATE

Offensive Security Certified Professional (OSCP) 2025

Mobile Application Penetration Tester (eMAPT) 2025

Certified Professional Penetration Tester (eCPPTv2) 2024

Web Application Penetration Tester (eWPTv1) 2023

Web Hacking Expert: Full-Stack Exploitation Mastery 2023

Awards

Ranked #1 on HackerOne — Sudan 2022

Ranked Top 22 globally on HackerOne for critical vulnerability submissions

Ranked #15 on HackerOne for OWASP Top 10 vulnerability reports 2022

Ranked #40 on the Saudi National Bug Bounty Platform 2022

2nd place — Sudan National Cybersecurity CTF, organized by CyberTalents 2021

Ranked #10 in the Saudi Bug Bounty program at Black Hat Middle East & Africa 2022
